MAYORAL APPROVAL 2021/22

17 June 2021

eThekwini Municipality

2021/2022 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

SUBMISSION OF THE 2021 / 2022 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

In terms of section 53(1) of the MFMA, the Mayor of a municipality must take all reasonable steps to ensure-

(c) that the municipality's service delivery and budget implementation plan is approved by the mayor within 28 days after the approval of budget.

The annual budget for the 2020/21 financial year was approved by Council at its meeting on the 27 May 2021 and accordingly, attached hereto, is the final SDBIP for 2021/22 financial year.

I, Councillor Mxolisi Kaunda in my capacity as Mayor of EThekwini Municipality, hereby confirm receipt of the final Service Delivery and Budget Implementation Plan (SDBIP) for 2021/22 as required in terms of section 53 (1)(c) of the Municipal Finance Management Act, 2003 (MFMA) as stated above.

COUNCILLOR MXOLISI KAUNDA
MAYOR: ETHEKWINI MUNICIPALITY

17 June 2021

eThekwini Municipality

FINAL 2021/22 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

SUBMISSION OF THE FINAL 2021/22 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

In terms of section 53(1) of the MFMA, the Mayor of a municipality must take all reasonable steps to ensure-

> (c) that the municipality's service delivery and budget implementation plan is approved by the mayor within 28 days after the approval of budget.

The annual budget for the 2020/21 financial year was approved by Council at its meeting on the 27 May 2021 and accordingly, attached hereto, is the final SDBIP for 2021/22 financial year.

Recommendations:

It is recommended that the final SDBIP for 2021/22 financial year be approved.

MR S. CELE
ACTING CITY MANAGER

2. Introduction

The purpose of this document is to present the Service Delivery and Budget Implementation Plan (SDBIP) of the eThekwini municipality for the 2021/22 financial year. The development, implementation and onitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is a requirement of the Municipal Finance Management Act, (MFMA) (Act No. 56 of 2003).

The City's Service Delivery and Budget Implementation Plan reflects the City's Integrated Development Plan (IDP) and associated budget in terms of deliverables and milestones. The SDBIP provides a credible information management plan to ensure service delivery targets and other performance management indicators are achieved. It is the mechanism that ensures that the IDP and Budget are aligned. The focus of the SDBIP is the creation of both financial and non-financial measurable performance objectives in the form of service delivery targets.

The Service Delivery and Budget Implimatation Plan (SPBIP) gives practical effect to the IDP and the budget of the municipality. It is an expression of the objectives of the City in quantifiable outcomes that will be implemented by the administration for the financial period. It includes the service delivery targets and performance indicators for each quarter which is linked to the performance agreements of senior management. It therefore facilitates oversight over financial and non-financial performance of the municipality. The continued Covid-19 pandemic has no doubt compelled governments to readjust priorities and ensure that we are sensitive to the needs of communities. We and have responded accordingly by adjusting priorities without compromising service delivery.

The SDBIP 2021/22 will not only ensure appropriate monitoring in the execution of the City budget and processes involved in the allocations of budgets to achieve key strategic priorities as set by the City's Integrated Development Plan (IDP), but will also serve as the kernel of annual performance contracts for senior management and provide a foundation for the overall annual and quarterly organization performance for the 2021/22 financial year.

The SDBIP also assists the executive, council and the community in their respective oversight responsibilities since it serves as an implementation and monitoring tool.

2.1. Legislative Framework

Section 1 of the MFMA defines the SDBIP as a detailed plan approved by the mayor of a municipality in terms of section 53(1)(c)(ii) for implementing the municipality's delivery of services and its annual budget and which must indicate:

a) projections for each month of :-

   (i) revenue to be collected, by source; and
   (ii) operational and capital expenditure by, vote

b) service delivery targets and performance indicators for each quarter; and

c) any other matters that may be prescribed, and includes any revisions of such plan by the mayor in terms of section 54(1)(c).

The MFMA requires that municipalities develop a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their Integrated Development Plan Strategy. In terms of Section 53 (1)(c)(ii) of the MFMA, the SDBIP must be approved by the Mayor of a municipality within 28 days of the approval of the budget.

2.2. Components of the SDBIP

- Monthly Projections of Revenue to be collected for each Source
- Monthly Projections of Expenditure and Revenue for each Vote
- Quarterly projections of Service Delivery Targets and Performance Indicators for each Vote
- Detailed Capital Budget over 3 Years

2.2.1 Monthly Projections of Revenue to be collected for each Source

The failure to collect its revenue as budgeted will severely impact on the City`s ability to provide services to the community. The Covid-19 pandemic has impacted on the economy and poses challenges for revenue collection.The City therefore has to institute measures to achieve its monthly revenue targets for each source. These measures will enable the City to assess its cash flow on a monthly basis with a view to undertaking contingency plans should there be a cash flow shortage or alternatively invest surplus cash. Furthermore, the effectiveness of credit control policies and procedures can be monitored with appropriate action taken if considered necessary.

2.2.2 Monthly Projections of Expenditure and Revenue for each Vote

The monthly projection of revenue and expenditure per vote relate to the cash paid and reconciles with the cash flow statement adopted with the budget. The focus under this component is a monthly projection per vote in addition to projections by source. When reviewing budget projections against actual, it is useful to consider revenue and expenditure per vote in order to gain a more complete picture of budget projections against actuals.

2.2.3 Quarterly Projections of Service Delivery Targets and Performance Indicators for each Vote

This component of the SDBIP requires non-financial measurable performance objectives in the form of service delivery targets and other indicators of performance. The focus is on outputs rather than inputs. Service delivery targets relate to the level and standard of service being provided to the community and include the addressing of backlogs in basic services. The approach encouraged by National Treasury's MFMA Circular No. 13 is the utilization of scorecards to monitor service delivery.

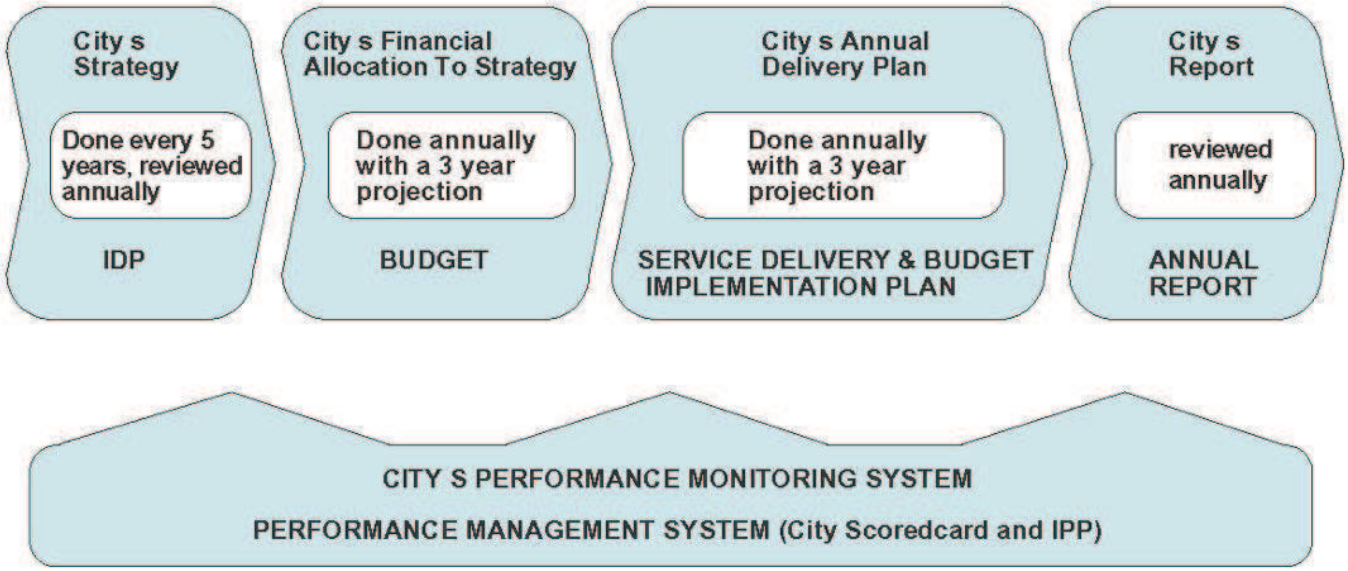
2.2.4 Detailed Capital Budget over Three Years

Information detailing infrastructural projects containing project description and anticipated capital costs over the three year period. A summary of capital projects per the IDP plan is available on Council`s website.

The procurement process is an important component to ensure effective and timely infrastructure / capital service delivery.

2.3. Strategic Direction and Planning Cycle

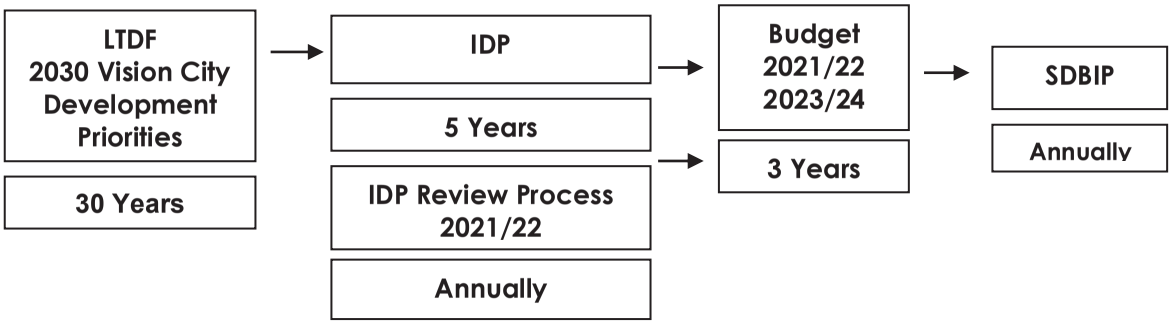
A seamless process between the Long Term Development Framework (LTDF), IDP, SDBIP, Performance Management System (PMS) and Annual Report would create an enabling environment for the municipality to achieve its deliverables.



The MFMA clearly outlines the elements of the SDBIP to provide an order of logical sequence to ensure that the principal aim of the SDBIP of aligning the IDP to the Budget is achieved and a conceptual framework was adopted.

The framework for eThekwini's SDBIP 2021/22 is derived from the City's LTDF, the IDP and the Budget 2021/22 as outlined in the following diagram:

SERVICE DELIVERY AND BUDGET IMPLENTATION FRAMEWORK



Significant strides have been made to address the key development challenges in the Municipality. While significant progress has been made in all areas, there is still some distance to go towards addressing the following challenges:

1. High rates of unemployment and low economic growth
2. Limited access to basic household and community services
3. Low levels of skills development and literacy.
4. High levels of poverty
5. Increased incidents of HIV / AIDS and communicable diseases
6. Loss of Natural Capital
7. Unsustainable development practices
8. Ineffectiveness and inefficiency of inward looking local government still prevalent
9. Ensuring adequate water and energy supply
10. Climate change
11. High levels of crime and risk
12. Ensuring food security
13. Ensuring financial sustainability
14. Infrastructure degradation

The essence of our LTDF is to achieve a balance between meeting basic needs, strengthening the economy and developing people skills and a technology base for the future. In an effort to achieve our 2030 vision, these three strategic focus areas of intervention for the next five years need to be balanced and integrated. Given the strategic framework that has been outlined, it is clear that the City's budget must be a pro-growth budget that meets basic needs and builds on existing skills and technology.

To address the challeges, the Municipality's delivery plan is organised into eight separate but related plans. The plans, programmes and projects are supportive of each other, to ensure greater impact in delivery and, its goals and outcomes are achieved. These EIGHT PLANS respond to the City's vision and values, thereby directing strategic focus areas, key programmes and strategic projects that are linked to the Council's capital and operating budget. The SDBIP is structured for easy reference to the IDP, i.e. according to the programmes and projects of the Eight Point Plan. In this way we have perfect alignment of the IDP and the budget. The eight point plans are:

1. Develop and sustain our spatial, natural and built environment
2. Developing the prosperous, diverse economy and employment creation
3. Creating a quality living environment
4. Embracing our cultural diversity, arts and heritage.
5. Supporting organisation design, human capital development and management
6. A vibrant and creative city – the foundation for sustainability and social cohesion
7. Good governance and responsive local government
8. Financially accountable and sustainable city

Each of these outcomes has been translated into the IDP strategic focus and performance areas as outlined in the Service Delivery Targets and Performance.

2.4. SDBIP Cycle

The SDBIP process comprises the following stages, which forms part of a cycle:

Planning:

During this phase the SDBIP process Plan is developed, to be tabled with the IDP Process Plan. SDBIP related processes e.g. workshop schedules distribution of circulars and training workshops, are also reviewed during this phase.

Strategising:

During this phase the IDP is reviewed and subsequent SDBIP programmes and projects for the next 5 years based on local, provincial and national issues, previous year's performance and current economic and demographic trends etc.

Tabling:

The SDBIP is tabled with the draft IDP and budget before Council. Consultation with the community and stakeholders of the IDP on the SDBIP is done through budget hearings and formal local, provincial and national inputs or responses are also considered in developing the final document.

Adoption:

The Mayor approves the SDBIP no later than 28 days after the adoption of the Municipality's budget.

Publishing:

The adopted SDBIP is made public and is published on Council's website.

Implementation, Monitoring and Reporting:

SDBIP projects are implemented and quarterly reporting takes place. Mid-year reporting is done to asses performance on the SDBIP, the document is amended, where applicable and adopted by Council.

3. The Budget Process

3.1. Background to the Budget Preparation Process

The budget process is an effective process that every local government must undertake to ensure good governance and accountability. The process outlines the current and future direction that the city would follow in order to meet legislative stipulations. The budget process enables the city to optimally involve residents and other stakeholders in the budgeting process. Budgeting is primarily about the choices that the municipality has to make between competing priorities and fiscal realities.

The budget preparation process is guided by the following legislative requirements:

- Municipal Systems Act
- Municipal Structures Act
- Municipal Budget Circulars
- Municipal Finance Management Act and
- Municipal Budget and Reporting Regulations

In terms of Section 15 of the MFMA, a municipality may except where otherwise provided in the Act, incur expenditure only in terms of the approved budget and within the limits of the amounts appropriated for the different votes in an approved budget. The MFMA prescribes further that the Council must for each financial year approve an annual budget for the municipality before the start of that financial year. An annual budget must set out realistically anticipated revenue for the budget year from each revenue source and expenditure appropriated under the different votes of the municipality.

Section 21 of the MFMA requires that a time schedule setting out the process to draft the IDP and prepare the budget be tabled ten months before the financial year. In compliance with this requirement the IDP and budget time schedule was tabled before council in August 2020. The main aim of the timetable is to ensure integration between the Integrated Development Plan, the budget and allied process towards tabling a balanced budget.

The National Treasury MFMA Circular No's 107 & 108 provided guidance on content and format for the municipal budget documentation in respect of the 2021/22 Medium Term Revenue and Expenditure framework (MTREF).

3.2. Capital Budget Process

The mechanism through which the needs of the municipality are identified and priorities set is the Integrated Development Plan (IDP). The capital budget is then accordingly allocated to cover the highest priority projects in the IDP. Capital budget allocations are often made at a project level through a prioritization process. In dealing with capital finance allocations, the city aimed to maintain a strategic balance between (1) the social objective of eradicating service backlogs and providing infrastructure to the poor, (2) the economic growth objective of providing infrastructure to support economic growth and increased municipal revenue, and (3) the objective of providing for rehabilitation and/or replacement of existing assets that had reached the end of their useful lives.

A series of meetings were held to ensure that the budget is prioritized, balanced and aligned to Councils IDP. A review of the capital borrowings and capital spending took place as the trend in borrowings is not sustainable in view of the increased financial charges and the impacts on tariffs. During the prioritization process of the capital budget, the impact of capital projects on future operating budgets was assessed and considered prior to these projects being approved.

3.3. Operating Budget Process

Budget meetings were also held with various clusters. At these meetings, budget strategy, budget policies and the alignment of the operating budget with the IDP were discussed. The IDP's strategic focus areas informed the development of the budget, in addition to assessing the relative capacity to implement the budget, taking affordability considerations into account. Further deliberations were held on the budget with a view to assessing the budget and reducing the deficit in order to ensure that the increases in rates and tariffs to balance the budget were restricted to an acceptable level. In order to address the initial budget deficit and ensure reasonable levels of tariffs and also to conform to National Treasury cost containment guidelines, austerity measures have been applied to the 2021/22 medium term budget.

3.4. Public Participation Process

The tabling of the Draft budget and approval in principle by Council on 31 March 2021 was followed by the publication of the budget documentation in the media. Public Hearings on the budget were held during April & May 2021. However, due to the continued COVID -19 Pandemic these were held regionally with community media platforms also being used. All questions / issues raised were recorded together with responses made.

3.5. Monitoring of the Implementation of the SDBIP

Progress against the objectives/targets set out in the SDBIP will be reported on a monthly, quarterly, mid-year and annual basis as set out in the MFMA.

A series of reporting requirements are outlined in the MFMA as follows:

- Monthly budget statements (Section 71)
- Quarterly reports (Section 52)
- Mid-year budget and performance assessment (Section 72)
- Annual report (Section 121)

3.6. General

Whilst the SDBIP largely complies with legislation as well as policy guidelines issued by National Treasury, it is however an evolving document and will continue to be refined to improve the content and the quality of information contained therein on a continued basis.

The SDBIP of eThekwini Municipality is developed according to the eight point plan as set out in the Municipal IDP. It contains the Strategic Focus Areas which is then drilled down into Programmes, projects and sub-projects. It reflects the quarterly and annual targets and the actual achievements/ non achievement of these targets is monitored on a quarterly basis. The ultimate aim of this monitoring is to ensure that the Municipality achieves its objectives. Where targets are not achieved, reasons for non-achievement and corrective action to be implemented are required. All SDBIP projects are linked, either directly or indirectly, to the key performance indicators contained in the organisational scorecard. This ensures that the City's strategic planning documents i.e. the IDP, Budget, organisational scorecard and the SDBIP are all linked.

There have since been enhancements in the system, to add value to the SDBIP reporting process. Some of the functions on this web based system include email reminders to stakeholders, reports reflecting projects that have under-achieved and linkages to the Organisational Scorecard and Individual Performance Management System. Evidence to support the actual achievements can be uploaded into the system and several validation rules have been built to ensure reasons for under performance, and measures taken to achieve set targets.

4. The Budget for 2021/2022

The following set of graphs gives an overview of the City Budget for the 2021/22 financial year.
